

Houston Community College

ASTR 1304: Introduction to Solar System Astronomy

A.1) Credit: 3 semester hours:3 Credits for Lecture

Usually students enrolled in a Lecture course attend 3 lecture hours per week.

A.2) General Information: An introduction to present theories about the structure and evolution of the solar system, compared to other models and theories since antiquity. A study of the celestial sphere and the constellations, the motions of the sky and the physical concepts used to understand them. A study of light, radiation and optics, and the instruments used to analyze celestial objects: telescopes and spacecraft. A survey of the sun, planets, moons, rings, asteroids, comets and debris in our solar system and the results from corresponding interplanetary probes. Core curriculum course. The prerequisite for this course is the successful completion of pre-algebra; MATH 0312. Contact the instructor should you have any questions. The astronomy courses are not requisites of one another and may be taken in any order.

A.3) Student Academic Outcomes: The successful completion of this course will enable the student to:

A.3.1) Understand the modern theories about the origins, structure and evolution of our Solar System and the bodies that make it up.

A.3.2) Examine the scientific method as it applies to the study of the solar system, and in varying degrees, to the student's own particular field of work or study.

A.3.3) Have the ability to obtain, understand and draw conclusions from simple scientific evidence.

A.4) CRN: **Term: Fall 2007**

A.5) Location:

Meeting Times:

In this course students will attend 3 hours per week in the classroom which will include lectures and some activities, HOWEVER; students may (depending on instructor) be responsible to attend out of the classroom activities such as night time observations, as scheduled, museums, field trips, astronomy societies/club meetings, and other pertinent activities.

Houston Community College

B) Requirements

B.1) TASP:

All students are expected to have taken the TASP exam before registration. Contact any counselor for information. Based upon HCCS policy, students can be administratively withdrawn if they have not taken the TASP exam.

B.2) ADA Disabilities:

If you have special needs and/or disabilities, please contact your instructor and/or the ADA counselor. If you have a disability, you must contact the instructor or any ADA counselor during the first week of class to obtain necessary documentation and testing arrangements.

B.3) Etiquette:

When in class cellular phones should be switched off or turned to silent mode. If a student must answer a call during class they should do so outside of the class room and once a student has stepped out then they can not re-enter. If the professor has not arrived by fifteen minutes past the beginning of class the class is dismissed. Students will not be let into the classroom who arrive later than fifteen minutes or more from the start of class time. During the class period students should be speaking of astronomy and only astronomy.

Students may find themselves in need of a recommendation for transferring to another college, or applying for a job or scholarship and instructors look for characteristics like the following in making a recommendation of a successful student.

- **Academic Integrity** – honestly pursuing your own academic goals
- **Study Skills** – Note taking and completing the assignments given
- **Being Attentive** – Paying attention during class time, listening to lectures and being prepared
- **Initiative** – Attending class, finishing the assignments on time, making an effort to be involved in the class and with class activities....

However; there are behaviors that are unacceptable and disruptive to the class, the following are examples of what not to do:

- **Electronic Devices** – **No cell phones**, calls on cell phones, text and/or picture messaging on cell phones and no using a computer for anything other than what is assigned class work.
- **Missing classes, extending breaks, tardiness, and leaving early** on a frequent basis shows a lack of respect for your instructor, your fellow class mates and yourself.
- **No talking in class** (unless on topic and/or permitted by your instructor), passing notes, sleeping or otherwise causing the disruption of the class
- **No Cheating** – cheating of any kind including but not limited to, plagiarism, copying or aiding another student dishonestly. **These behaviors will not be tolerated.**

Sexual Harassment

It is a violation of HCCS policy for an employee, agent, or student of the college to engage in sexual harassment as defined in the EEOC guidelines (EEO/AA Compliance Handbook 47).

Houston Community College

B.4) Academic Responsibility:

It is the student's responsibility to be aware of HCCS attendance, conduct, and the academic conduct requirements. It is the student's responsibility to withdraw from the course by the appropriate date as listed in the schedule. Please read the student handbook. Any students using unauthorized material on a test or lab report, is subject to administrative withdrawal from the course and/or will receive a grade of zero for the respective test or report. Other disciplinary action may be taken as appropriate. Should the student have any grievance or problem dealing with any aspect of the course, please talk with your instructor, **outside of class**.

POLICY ON INTELLECTUAL DISHONESTY: Student Copy

Except for the group or team assignments, papers, case analyses, projects, etc., are individual assignments that are part of the learning experience and must be completed personally by the student. Copying another student's assignment, including computer programs and files, or citing material without credit to the author is plagiarism and cheating on exams—including getting help on take-home exams—is grounds for failing the course and/or expulsion from the university.

C) Content and Schedule:

C.1) Tentative Schedule

Week	Class period	Date	Chapter	Topic
1	1		1	The Scale of The Cosmos
	2			
2	3		2	The Sky
	4			
3	5		3	Cycles of The Moon
	6			
4	7		4	The Origin of Modern Astronomy
	8			
5	9		5	Newton, Einstein and Gravity
	10			
6	11		6	Light and Telescopes
	12			
7	13		7	Starlight and Atoms
	14			
8	15		8	The Sun
	16			
9	17		19	The Origin of the Solar Solar System
	18			
10	19		20	Earth: The Standard of Comparative Planetology
	20			
11	21		21	The Moon and Mercury: Comparing Airless Worlds
	22			
12	23		22	Comparative Planetology of Venus and Mars
	24			
13	25		23	Comparative Planetology of Jupiter and Saturn
	26			
14	27		24	Comparative Planetology: Uranus, Neptune and Pluto
	28			
15	29		25	Meteorites, Asteroids and Comets
	30			
16	31		26	Life On Other Worlds
	32			

Houston Community College

D)Course Format:

Grading:	Lecture:	
	Exams	40%
	(Drop the lowest of four, average three)	
	Homework:	15%
	Lecture Quizzes:	15%
	Video Reviews	10%
	Lab:	
	Explorations:	10%
	Observations:	10%
	TOTAL	100%
No make-up exams	No late assignments	

The last 4 digits of you SS# will be your secret code to published grades unless you let the instructor know of another code. If you do not want to have your grade published, please talk to the instructor after class.

Notice: If you feel you are going to be unable to continue with the course or you must stop attending class periods and you wish to drop the course you must do so by the posted **drop date**, use the following link to access the student calendar;
http://www.hccs.edu/system/insdev/spin/student/calendars/calendar_links.htm
Failure to do so by this date will result in an **F** in the course.

Special Requirements for “A” and “B” grades (what the student must know or do over and above the minimal content mastery to demonstrate excellent or high achievement): An “A” grade requires an average score of 90 or above for all means of assessment. A “B” grade requires an average score of 80-89 for all means of assessment.

D.2) Detailed Descriptions of Required Course Activities:

D.2.1: (40%) In class Exams: All students will prepare by studying the chapters in the text, by doing the homework assignments and by researching in the library, on the Internet, or any other credible source of information. There will be four in class exams and one final exam. All exams will be closed book. You will be required to buy about 20 scantron sheets from your local bookstore (Form No. 882-E) for all exams and homework assignments during the course. **Make up exams are not administered.** The lowest of the four in-class exams will be dropped. If you do not appear for one exam, for any reason, your grade for that exam will be a zero and that is the exam grade that will be dropped. The final Exam is mandatory and not optional. Exams are due immediately following the examination period.

D.2.2: (20%) Lecture Quizzes: All students will be required to attend and listen to the lectures during the class periods and to answer the accompanying quizzes. These quizzes will be administered directly following the lectures. The Lecture Quizzes are due immediately following the completion of the corresponding lecture. With a credit deadline at the beginning of the next lecture.

Houston Community College

D.2.3: (20%) Web Based Homework:

D.2.4: (10%) Video Reviews: The student will be expected to watch the videos shown during the semester and complete an accompanying video review sheet that will be due immediately following the completion of the said video. The video reviews are due immediately following the presentation of the video.

D.2.5: (10%) Explorations: The students will learn to navigate the night sky by doing exercises with the help of selected computer software and a desktop planetarium program. The Internet will also be used to retrieve related astronomical news and information. Assignments that accompany the explorations are to be submitted by the end of the class period or by the date specified by the instructor.

D.2.6: Field Trips: Only if instructed by your instructor

The George Observatory: At Brazos Bend State Park

The observatory is open to the public every Saturday night. You can go out there on any Saturday night. Turn in your park pass receipt taped to a sheet of paper and a **one-page summary** of what you did and learned to your instructor for credit.

1. This observatory has magnitude 5 skies except to the north and northwest due to light pollution from Houston and other cities.
2. The Trip is about an hour from downtown to the park.
3. From Downtown head south on US 59. Drive south through Houston. After passing Sugarland you will drive over the Brazos River. The first exit past the river is The Grand Parkway exit (your exit). You will also see a brown sign announcing the same exit for Brazos Bend State Park. Take the exit and turn left crossing over the freeway and head south on 2759. There's a Burger King/convenience store at this location. About a mile down the road you will intersect with 762. Continue through the intersection, still heading south, do not turn. The road name changes to 762. Follow this road for about 15 miles through many ninety degree turns (take a left turn at the light) until you get to the gate of the park which will be on your left.
4. An alternative route is to take US 288 south of Houston and follow the brown signs to the state park (use a map).
5. The charge to get inside the park is \$4 per person or you can use a season pass if you have one. Ask the park ranger how to get to the observatory.
6. There will be many amateur telescopes on the deck of the observatory. The main 36-inch telescope costs \$3 per person - buy your ticket early, they usually sell out. 8. There is an astronomy gift shop and there are soda vending machines.

Houston Community College

7. Bring: insect repellent

8. What to do?

There will be astronomy presentations, big scopes and little scopes, and many experienced amateur astronomers with their sophisticated equipment to talk to.

9. The George Observatory is operated by the Fort Bend Astronomy Club & The Houston Museum of Natural Science.

Land, Sea & Sky at 1925A Richmond Ave, Houston, TX, 77098
713-529-3551

Houston Museum of Natural Science, Herman Park
713-639-4629

Space Center Houston (2 points), Clearlake, TX
281-244-2100

Burke Baker Planetarium & Imax Theater (several shows, one point per show), at the museum 713-639-4629

D.2.5.1: Club Meetings

Meetings of the North Houston Astronomy Club:

Meetings are held on the 4th Friday of every month. They are held in the Teaching Theatre located in the Science Building of Kingwood College @ 7:30 p.m. (Novice session @ 6:45 is a 3rd point): <http://www.astronomyclub.org/>

Meetings of the Houston Astronomical Society:

Meetings are held on the 1st Friday of every month. They are held in room #117 of the Science and Research Building I of the University of Houston, central campus @ 8:00 p.m. (Novice sessions across the hall @ 7:00 p.m. and is a 3rd point); <http://spacibm.rice.edu/~has/>

Meetings of the Fort Bend Astronomy Club:

The Fort Bend Astronomy Club meetings are held at the HCC southwest campus in Stafford, TX. Meetings begin at 7:00 p.m. in the #7 lecture hall and in rooms 102/104 and usually feature both novice and advanced programs. <http://www.fbac.org/>

Johnson Space Center Astronomical Society:

JSCAS meets on the **second** Friday of every month at 7:30 PM. the meetings are held in the auditorium at the Center for Advanced Space Studies (formerly LPI) located at 3600 Bay Area Blvd. (at Middlebrook Drive). <http://www.ghg.net/cbr/jscas/>
